EXPERIENCE

ZINIER | SDE INTERN

Bellandur, Bangalore | December 2024 – Present

- Contributed to the development of Ziniers low-code automation platform by designing and implementing key UI components that streamline field service operations.
- Played an active role in projects with high-profile clients such as Virgin Media and Injixo, helping customize and deploy modules tailored to their specific operational needs.
- Enhanced the user experience (UX) by building intuitive workflows and responsive interfaces using React, Redux, and Tailwind CSS.
- Collaborated closely with product designers and backend engineers to ensure seamless integration of frontend features with dynamic backend logic.
- Improved component reusability and reduced development time by introducing shared component patterns and modular architecture within the frontend codebase.
- Participated in agile sprints, regularly contributing to planning, code reviews, and QA processes to ensure timely delivery and high-quality output.

ONEROOT | SDE INTERN

E-City, Bengaluru | Feb 2025 – May 2025

- Independently designed, developed, and deployed the entire React Native mobile application from the ground up, now successfully live on the App Store.
- Built robust features including real-time live location tracking and push notification support, powered by a custom Node.js backend server for seamless communication and updates.
- Delivered a polished, user-friendly interface with smooth navigation and responsive design to ensure excellent user experience across devices.
- Handled end-to-end integration between frontend and backend, ensuring reliable data flow, real-time updates, and performance optimization.

SKILLS

PROGRAMMING LANGUAGES
LIBRARIES/Frameworks
DATABASES

Javascript, TypeScript, Python, HTML, CSS, Rust, Java
React.js, React Hooks, Next.js, Redux, Tailwind CSS, React Native
MySQL, PostgreSQL, MongoDB, Sequelize, Supabase, Firebase

HONORS & AWARDS

- Achieved World Rank 18 out of 29,729 in CodeChef START154D and earned LeetCode Knight status with a 2047 rating, showcasing strong competitive programming skills and advanced problem-solving ability.
- Actively contribute to open-source software daily, playing a significant role in building key components of Kora, a Rust-based blockchain relayer project.
- Solved multiple bounties for the Solana Foundation, including adding token support to the Token Interface and enhancing integration with Jupiter, significantly improving DeFi usability.
